

For Immediate Release

Mannington Commercial Introduces the Attune Collection

*Heterogeneous Resilient Sheet Flooring Featuring Comfort and High-Performance Technology
Ideal for Healthcare*

CHICAGO – NeoCon Exhibition – June 12, 2023 — Mannington Commercial, (10th Floor, 1039), a leading manufacturer of commercial flooring products crafted with purpose, is introducing the [Attune Collection](#) at NeoCon. A resilient heterogeneous sheet collection developed specifically for healthcare designers, facility managers, staff and patients, Attune offers exceptional aesthetics, acoustics, comfort and durability, essential elements needed for today's modern healthcare facilities.

Attune is a 7.0mm resilient sheet product developed from a 2.0mm heterogeneous sheet and fusion-bonded to 5.0mm of vulcanized composition rubber. The product utilizes itsTRU™ technology, a manufacturing process that creates a customized, high-performance flooring surface. The proprietary fusion-bonding process enables the floor to retain its shape and peel strength, even after heavy rolling from medical carts and other equipment.

Available in 28 colors across artfully crafted wood, stone and abstract visuals, Attune offers an aesthetic look versatile enough to meet the design needs of spaces such as ICUs, patient rooms, behavioral health facilities and senior living communities. Attune's acoustical properties promote a calming environment, which can result in better sleep for patients and improved cardiovascular responses that can support the healing process. Recognizing that healthcare professionals spend most of their time walking or standing, Attune also provides exceptional comfort underfoot. The product is designed to absorb the right amount of footfall impact, creating an ideal "bounce back" to support caregivers as they walk, which can help reduce joint pain and muscle fatigue.

Easy to clean and maintain, Attune can be installed with Mannington Commercial's IdealBase®, a rubber wall base that eliminates the need for flash coverings and provides a sanitary solution by offering a seamless transition from floor to wall with an aesthetically clean design.

The collection, made in the U.S., features a 15-year warranty and Quantum Guard Elite®, Mannington Commercial's industry-leading performance technology that ensures long-term durability.

As part of Mannington's ongoing commitment to the environment, the collection's embodied carbon is offset by 105 percent from cradle to gate. In addition, itsTRU™ technology is engineered with a proprietary, zero-waste upcycling process that starts with rubber truck tires diverted from the waste stream.

Designers, architects, specifiers and other professionals looking for samples or more information can visit Mannington Commercial's [NeoCon 2023 press site](#).

About Mannington Commercial

Mannington Commercial crafts flooring with purpose. The company offers a full range of products designed to inspire creativity and deliver advanced performance in all types of commercial spaces.
