

**For Immediate Release**

**Mannington Commercial Introduces the New Composition Collection**  
*Inspired by Pioneering Abstract Artist Wassily Kandinsky, Modular & Broadloom Carpet  
Designed to Spark Creativity and Harmony*

**CHICAGO – NeoCon Expo – June 12, 2023** — Mannington Commercial (10<sup>th</sup> Floor, 1039), a leading manufacturer of commercial flooring products crafted with purpose, is introducing the [New Composition Collection](#) at this year's NeoCon. Inspired by Wassily Kandinsky, a pioneer of abstract art and his groundbreaking *Composition* series, the imaginative modular and broadloom carpet collection transforms flooring design into artistic play, crafting harmonious spaces that are engaging, creative and warm.

New Composition features three coordinating styles with the simple forms that Kandinsky favored—lines, squares, and triangles—delicately layered and expressed in neutrals, brights and deeper jewel tones. Both the broadloom and 24-inch square carpet tile allow designers to approach the collection like an artist with a canvas, arranging styles and colors to compose a harmonious environment.

Sublime State features a geometric pattern and layers tonal blocks over a softly striated background, creating peacefulness in the visual play of shifting forms. Trance End provides dynamic detail with triangles arranged among delicate scaffolding. The more linear Inner Share creates a calming sense of directional movement, designed for use on its own or as a transition between the other styles.

"New Composition is an homage to Kandinsky's paintings where elements of shape and color are arranged in unexpected harmonies that speak directly to our emotions and creativity," explained Roby Isaac, Mannington Commercial Vice President of Commercial Design. "Ultimately, New Composition invites you in, engages you and creates a sense of harmony, both within and beyond our interior spaces."

Constructed for maximum performance, the collection is made of solution dyed 6,6 nylon with permanent built-in stain resistance. High performance backing options include Mannington Commercial's Infinity® 2 Modular and Integra® HP or UltraBac® RE broadloom backings, all of which offer solutions for high-moisture installations.

To support the wellbeing of people in the built environment, New Composition is Green Label Plus certified as low-emitting for better indoor air quality. The flooring contains recycled content, is 100 percent recyclable, and features an HPD and EPD for total transparency. Additionally, 105 percent of the products' embodied carbon is offset from cradle to gate. Made in the U.S., the collection is produced in facilities certified to ISO 14001, supporting local economies with conservation-minded manufacturing.

Designers, architects, specifiers and other professionals looking for samples or more information can visit Mannington Commercial's [NeoCon 2023 press site](#).

**About Mannington Commercial**

Mannington Commercial crafts flooring with purpose. The company offers a full range of products designed to inspire creativity and deliver advanced performance in all types of commercial spaces. Across modular carpet, broadloom, LVT, resilient sheet and rubber, customers receive coordinated solutions to meet their specific goals. The fifth-generation, family-owned company is guided by this dedication to its customers and to making a positive impact on the environment and local communities.
